

Spring Seminar: Climate Change Impacts in the Northeastern U.S.

Course title on SPIRE: Climate Impacts in New England

Course #: CEE 697CC / GEO-SCI 697CC

Wednesdays 3:35-4:25pm

This 1 credit seminar will explore impacts of climate change on the Northeastern US. Seven speakers from various academic disciplines are invited to speak via webinar on topics of ecology, water resources, land use, and cultural resources. Attendance at lectures is absolutely required. Additional meetings will focus student-facilitated discussion on issues addressed by the speakers as well as assigned readings. The speaker list is at:

Led by:

Richard Palmer
(Civil & Environmental Engineering)

Raymond Bradley
(Geosciences)

Addie Holland
(Geosciences)
