Cosmic Apprentice, dedicated to Sagan's parents: the late iconoclastic UMass biologist Lynn Margulis (called the "Darwin of the 20th century") and the famed astronomer Carl Sagan, host of the original Cosmos series, Dorion Sagan's latest weaves together science, philosophy and personal experience to integrate everyone into the microcosm and macrocosm, and explicates what philosopher Alfred North Whitehead called the "vast" universe.

"How did life give Earth the blues--literally?"

"Why should you not get mad if someone says you are old -- really old?"

"How can aging be right now slowed and in the future stopped (leading however to possibly catastrophic population problems) by using current science?"
